Introducing Cargo Insurance for Research Infrastructures, members of the RI Logistica Association:

Our Cargo Insurance for Research Infrastructures, members of the RI Logistica Association, is a specialized insurance solution tailored to meet the unique needs of research institutions and organizations transporting equipment, instruments, research samples, and valuable goods related to scientific research. Designed to mitigate the risks associated with the transport of sensitive cargo, this insurance coverage provides financial protection, peace of mind, and safeguards against potential losses.

Extensive coverage		Our cargo insurance offers comprehensive coverage for all stages of the research infrastructure's cargo journey, from the moment it leaves the laboratory or research facility until it reaches its intended destination. This includes coverage for international shipments, multiple modes of transportation (sea, air, and land), and temporary storage during transit.
All-Risks Protection		We provide all-risks coverage, which means that your cargo is protected against a wide range of perils, including but not limited to fire, theft, water damage, collisions, accidents, and natural disasters. This ensures that your valuable research equipment and instruments are safeguarded from unforeseen events during transportation.
High Value and Sensitive Cargo Coverage		Research infrastructures often deal with high-value cargo, such as advanced scientific instruments and delicate equipment. Our cargo insurance provides specialized coverage for these sensitive items, offering protection against damage, breakage, or loss during transit.
Timely Claims Settlement		In the unfortunate event of a loss or damage to your cargo, our claims process is designed to be efficient and expedient. Our claims team works diligently to assess claims promptly, ensuring a smooth and timely settlement, allowing you to recover quickly and continue your research activities.
Risk Management Support		We go beyond insurance coverage by offering risk management guidance and support to help you identify and mitigate potential risks associated with cargo transportation. Our team of experts can provide valuable advice on packaging, handling, labeling, and securing your research cargo, reducing the likelihood of incidents.
Global Network		With a wide-reaching network of cargo insurance professionals and service providers, we can offer coverage for research infrastructures worldwide. Whether your cargo is being transported across oceans or to remote locations, our global presence ensures that you receive the same high level of protection and support.
Costs to be insured for samples		We understand that each project is unique, and we work closely with you to design a policy that aligns with your cargo's characteristics, destination, and associated risks. The following costs can be insured for samples: Labor costs, Travel costs, Costs for accommodation, Costs for access and use of the research institute and Costs of material.

Secure your Research Infrastructure's Cargo Today:

By choosing our Cargo Insurance product, research infrastructures can focus on their core objectives of advancing scientific knowledge and innovation, knowing that their valuable research samples and equipment are protected throughout the shipping process. For detailed information, terms, and conditions, please consult with our insurance professionals.
